

Your website vision
our website magic

British Websites.

You'll be in
SAFE HANDS

You will get all the help and guidance you need from our expert designers and developers who will bring your website to life. We have extensive knowledge in our key development languages including HTML5, CSS3, JavaScript, PHP & MySQL.

With our experience in UI and UX your visitors will have an enjoyable, smooth and intuitive experience, including the "calls to action" you need. No matter what your vision, we'll make your website look fantastic and present your brand beautifully on all devices.

The Beauty of OUR WEBSITES

Our websites are tailor-made on our BW Core, which was all developed using our key languages in-house. It gives your website immense power and ultimate flexibility. It also means we can build nearly anything you want and integrate any third-party plugins.

Browse around our map at www.b-w.uk to see a few examples of our websites in a range of categories. If you would like to see more, contact us and we will show you examples for inspiration that include features matching your website requirements.

Three simple steps
BEFORE WE QUOTE

We will help you understand everything you need to know for total clarity over your website build. Take a look through our three simple steps.

It's all about
YOUR IDEA

Your ideas are paramount. You may have an initial concept or your complete idea planned out from start to finish. We will start by getting to know you and your ideas so we can structure your project and discuss your needs.

1

3

Getting to know YOUR BUDGET

We need to know what budget you are working with for your website, even if it's just a starting point. All of our websites are unique and built for you and your visitor's needs.

We then develop your features and services to meet your project's needs and keep within your pricing expectations. If you really don't know your budget, get in touch and we can give you an estimation on the costs involved to realise your idea.

Developing your PROJECT BRIEF

We believe that every website project should begin with a detailed brief and an accurate quote. We only provide fixed price quotes when we have enough detail to make sure we can give you exactly what you need.

Our experts are here to help. With our Project Planning Service, you can take advantage of our years of knowledge and experience. It will give you a real understanding and the confidence to make the right decisions moving forward.

When you're ready

WE'RE READY

Our specialists will review your brief, requirements and budget. For most projects you will receive a fully itemised quote to match your detailed Project Brief so you can analyse individual costs.

If time is of the essence and your budget is sufficient, we can provide you with a Quote Summary and breakdown which will list items you have deemed necessary.

1 hour free

Website Consultation
